

It was never **this easy**

TO MANAGE A UAS OPERATOR

Plan, operate live and record every flight from a single platform.

8

telemetry readings from each UAS

25

live feeds at once on one screen

4

ways in for flight logs

0

data to retype after the flight

— AT A GLANCE

Your whole UAS operation on one platform

Team and fleet

Pilots, UAS and batteries with their record and status. The fleet builds itself from the flights.

Operations centre

Position, telemetry, flight path and video of every UAS on one map.

Maintenance and batteries

Servicing by hours and date, and the health of each battery.

Officers on foot - TeamSync

The Operations centre (CENOPS) sees staff on foot: position, requests and camera.

Planning

Operations on the map with ENAIRE, weather and checklist.

Flight logs

They come in on their own and update the logbook of pilots and UAS.

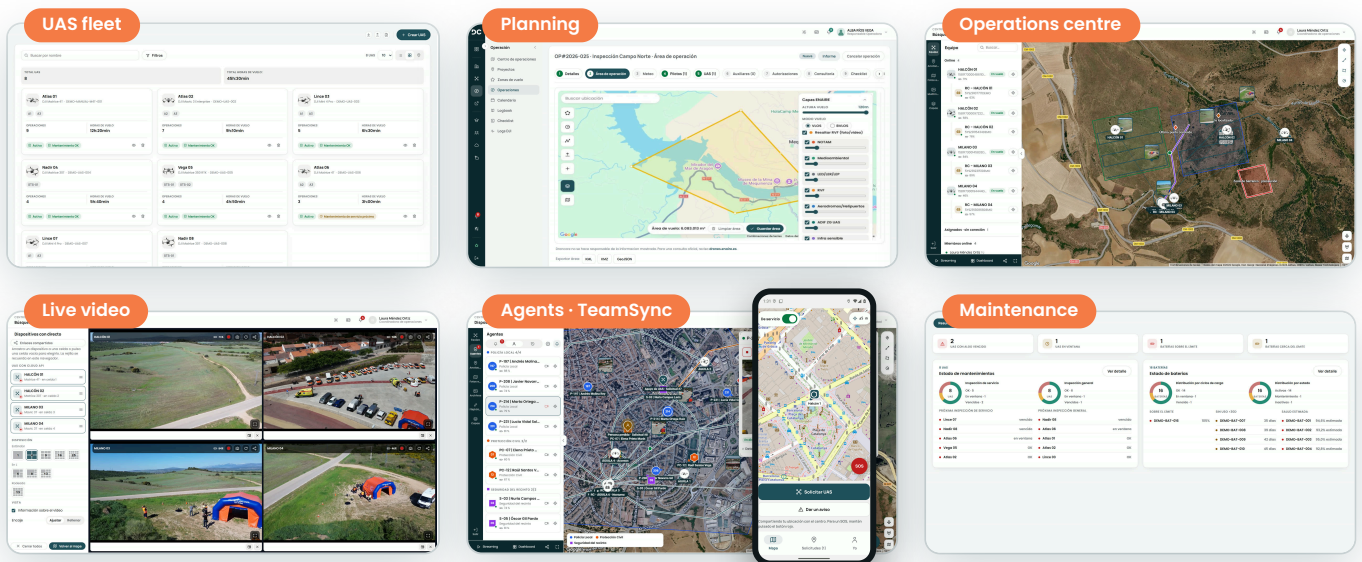

Compliance

Qualifications checked against AESA and expiry alerts.

Reports

Operations, logs and logbook ready to export.

ONE PLATFORM, MANY WAYS OF OPERATING

Law enforcement

Fire services

Emergencies and civil protection

Companies

Training organisations

Consultancies

The fleet builds itself from the flights

Upload the flight logs and DRONCORE® registers the UAS, controllers and batteries that appear in them, with their model and serial number. The inventory is done without typing it in.
